

## **Wiltshire & District Cat Club, 3-7-2010**

**Mrs V A Anderson**

Many thanks to Elaine & Jackie for the invitation. I had a lovely day and some super cats to judge and lots of purry ones! Many thanks to my steward Heather Roper and her daughter Melissa for all their help especially as they had just moved house and had a very busy week.

### **RUSSIAN BLUE KITTEN**

A difficult class as 3 very young kittens with lots of developing still to do.

**1ST & BOB CURTIS'S CURTILLA CZARA (16A) F 22.03.10**

A baby girl of only 3 months & of a good size for her age. Rounded top to the head & angle yet to develop. Quite short wedge & prominent whisker pads when prompted, teething at present but her bite is OK. Large well-set ears with a broad base. Wide-set eyes that could be a little larger, the colour developing at present. Elegant body with limbs to balance. Long tapering tail with lots of rings at the moment. Short coat with a soft texture, double and reasonably plushy. Nice overall colour with a silvery-sheen developing well. Sweet nature and easy to handle.

**2ND CURTIS'S CURTILLA TSASCHA (16A) F 22.03.10**

Litter sister to Czara and not quite so well grown but a sweet girl with a big purr! Her head is a little long & could be broader. Rounded top of the head, bumpy profile & her nose goes over her chin. Level bite but teething. Prominent whisker pads but a little pinched behind at present. Large tall ears set vertically to the head & wide set almond eyes that could be a little larger, the green colour developing. Long body with elegant limbs & small oval paws. Tapering tail to balance but ringed and with a slightly swollen tip. Nice coat, soft & quite dense with a fine texture. Nice medium blue colour with a silvery sheen & good colour at the roots. Looked better when she relaxed.

**3RD NOBLE'S LARKSONG SUPAFast JELLYFISH (16a) F 12.03.10**

Although slightly older than the other 2 kittens in the class she looked younger. A very gentle girl with a sweet nature and easy to handle. Short wedge & slightly rounded top to the head. Her profile is a little straight and her chin could be stronger, level bite. Her whisker pads could be prominent and she is a little pinched behind at present. Large ears with a broad base & set vertically to the head. Wide-set eyes of a rounded almond shape. Elegant body with limbs to balance and tiny oval paws. Long tapering tail. Coat double with a fine texture but could be denser and needs to develop. Good medium blue colour with a silvery sheen developing.
